

A map of the United States where each state is shaded in grayscale to represent the percentage weight of the 'Other' category. The shading is darkest for California, Texas, and several states in the Northeast and Midwest, indicating higher percentages. Many states in the West and South are shaded lighter, indicating lower percentages. A legend at the bottom left shows a grayscale gradient from white (0) to black (16) with intermediate labels at 4, 8, and 12.
